

Inoviem Scientific is a contract research biotech company offering innovative solutions for pharmaceutical and biotechnology industries. Our goal is to be a partner of choice for our clients in fostering more efficient and safer drugs through our 2 proprietary technologies, NPOT® (for isolation and the identification of therapeutic compounds' interactome within human, healthy or pathological, tissues) and PIMS® (patient stratification, biomarker identification, personalised medicine). Altogether, those cutting-edge technologies enable to decipher the mode of action of drug candidates, securing drug development for the next step.

In order to reinforce its research team, Inoviem Scientific is recruiting:

« Research Scientist / Data Analyst (H/F) »

Your mission will consist in managing research project in partnership with a pharmaceutical client, from the study design to the data analysis and the result reporting.

You will be in charge of following data acquisition through our innovative technologies, and writing reports, for our clients.

You will be involved in internal drug development programs as well as external research collaboration.

You will be under the responsibility of the scientific director.

Profile:

- PhD in Biology, Biochemistry, Biotechnology or Pharmacology
- Fluent verbal and written English
- Aptitude and enthusiasm for report writing and data analysis
- Knowledge of common bioinformatic tools for network analysis (DAVID, STRING, IPA®...)
- Excellent communicator and ease in customer relationship
- Multidisciplinary mindset: knowledge in immunology, metabolism, oncology or disease-related areas is highly recommended
- LC-MS/MS experience, network analysis or working with big datasets is a plus

We are not looking for an expert in a specific domain, but more a curious, open-minded, critical, proactive and dedicated scientist willing to face new challenges in a constant evolving environment. Hence a proven track record of your multidisciplinary mindset would be an advantage.

This position is currently open for a maternity leave replacement (CDD 8 months) with a possibility of extension.

Send your CV and cover letter to Dr Daniel DA COSTA / Dr Rachel AMOUROUX, by email at: [job\[at\]inoviem\[dot\]com](mailto:job[at]inoviem[dot]com).
